

Nuance® Dragon® Dictate for Mac®

Accurate and fast speech recognition,
plus versatile transcription capabilities all in one

The challenge

Mac users including writers and bloggers, creative professionals, high school and college students, journalists, business people, home users, educators and many others may want to be more productive and use their voice to command their computer.

These users may also have a need for powerful, accurate transcription capabilities from any audio source for personal audio transcription, transcription of lectures and presentations either by the speaker or by another individual, transcription of recorded audio data gathered during interviews or from the Internet, such as podcasts, note taking and report writing in the field or transcribing the audio portion of a video of a single speaker in video production.

The solution

Dragon Dictate for Mac is the ultimate productivity tool that enables you to save time and get more done. Dictate, edit, transcribe and control your computer all by using your voice. Dragon's accurate speech recognition, customisable capabilities, easy-to-use interface and full transcription flexibility means you get more done – at home, college or work – quickly and accurately.

Dragon Dictate for Mac now includes the powerful capability to accurately transcribe an audio file of any single speaker's voice from podcasts or pre-recorded audio files. Great for transcribing college lectures, interviews, recorded notes...and more! You now get accurate and fast speech recognition, plus versatile transcription capabilities all in one.

New in Dragon Dictate version 4

Powerful transcription. More control. More accurate. Faster.

- Accurately transcribe an audio file of any single speaker's voice from podcasts or pre-recorded audio files*
- Multiple transcription sources allowed within a profile so one user can easily work with different recordings
- Full Text Control for creating emails in Gmail
- Voice control your Gmail inbox within Safari® and Firefox®
- Mix talking and typing with Full Text Control in Apple Pages 4.3
- Higher performance and faster editing with pure 64-bit application and improved memory management capabilities
- Improved accuracy over version 3.x, with optimisation for latest speech recognition technology.

Key features and benefits

Flexible voice commands

- With just your voice, create and edit documents in Apple® Pages® 4.3, compose and manage email in Gmail™ and more, to get things done quickly
- Smart Format Rules automatically adapt to how you want abbreviations, numbers and more to appear, so you don't have to correct it every time
- Easily create custom word lists and macros for frequently used text.

Powerful transcription

- Full transcription capabilities to easily transcribe your voice memos into text
- Accurately transcribe an audio file of any single speaker's voice from podcasts or pre-recorded audio files.

Up to 99% accurate

- Make fewer edits and get more done.

Speed

- Faster than typing.

Powerful transcription capabilities

Accurately transcribe an audio file of any single speaker's voice from podcasts or pre-recorded audio files.

- Create transcription-only profiles to accurately transcribe based on recorded sources instead of requiring a live source*
- Only a 90 second audio clip is required to create a profile for the speaker
- Great for college lectures, interviews, business users with recorded notes...and more!
- Transcribe from many different formats, including .mp3 audio files
 - In addition to .aif .aiff .wav .mp4 .m4a .m4v.

Multiple transcription sources allowed within a profile so one user can easily manage different recordings.

- Expanded profile capability to allow multiple transcription sources per profile, making it even easier for one user to transition back and forth from personal dictation to one or more transcription files within the same project
- Not only can you easily transcribe your own voice memos from a smartphone or portable voice recorder into text, but you can seamlessly mix and match transcribing from other recording sources
- You can keep all the customisation and vocabulary from your profile without having to switch out to a different profile.

System requirements

- CPU: Intel® Core 2 Duo 2.4 Ghz or faster processor - Intel Core i3, i5 or i7 recommended
- Free hard disk space: 3GB
- Supported operating systems: OS X® Mountain Lion (10.8.3), OS X Mavericks (10.9), OS X Yosemite (10.10)
- RAM: 4GB, 8GB+ recommended
- A DVD-ROM drive for installation
