

UNLEASHING A SPEECH RECOGNITION DRAGON IN YOUR SURGERY

KEY BENEFITS OF USING DRAGON MEDICAL SERVICED BY G2 SPEECH:

- Dictate faster and more accurately than ever before
- Dictate anywhere in your clinical system
- Eliminate transcription costs
- Spend more time with patients
- Dragon Medical makes the use of electronic patient record (EPR) systems easier
- Enjoy the services of a market leader in speech recognition

Station Road Surgery in Frimley is a well-run small GP Practice which serves the local community with 5 doctors. Dr Jane Snell, one of the GPs at the practice, has conducted a trial on a new way of dictating her notes and patient letters using the Dragon Medical software by Nuance Healthcare.

Dragon Medical offers speech recognition that is particularly suited to stand-alone usage, making it ideal for medical and GP practices. It enables doctors to take advantage of front-end speech recognition, producing letters and documents that appear instantly on the computer screen, ready for immediate checking and sign-off.

Dr Snell explained:

“I am really enjoying using Dragon Medical, the speech recognition system has helped reduce the time I spend documenting notes.

What is best about the Dragon Medical software is that it is up to 99% accurate, I wasn't expecting it to work so well but have been impressed with the extensive medical vocabulary. Of course it makes the odd mistake – mostly with new drug names – but I have been able to add these to the dictionary and found that the system learns quickly.

When I dictate letters, I no longer systematically need them to go to the secretary (we share one secretary between us). It is great to be able to edit and review them almost immediately myself. This is fantastic when the secretary is on holiday. Another benefit is that she frees up her time to do things like chasing down appointments or ringing round for results which is a big help.”

ABOUT G2 SPEECH

G2 Speech is a market leader in speech recognition and digital dictation solutions for hospitals and other healthcare organisations, using efficient and highly accurate digital technologies created specifically for the medical environment, improving workflow efficiency and delivering significant reductions in cost.

I generally dictate about 25-30 letters a week and being able to see the text as I speak it helps me not to lose track of what I want to say. G2 Speech has been very helpful in setting the software up and I certainly wouldn't go back to the old fashioned way of dictating now.

GPs are buying their Dragon Medical solutions from G2 Speech because they are a market leader in speech recognition and digital dictation solutions for healthcare organisations. Using efficient and highly accurate digital technologies from Nuance – created specifically for the medical environment to improve workflow efficiency – Dragon Medical frees up GPs time and delivers significant reductions in cost.

The impressive accuracy rates (up to 99%) achieved with speech recognition mean that healthcare professionals are now recording and distributing their consultation notes, letters to patients and other medical information almost instantly.

Dragon Medical delivers impressive returns on investment for GP surgeries and other healthcare organisations.

ABOUT NUANCE HEALTHCARE

Nuance Healthcare is a division of Nuance Communications, the world's leading provider of speech and imaging solutions. Today, Nuance Healthcare provides the most comprehensive family of speech-driven clinical documentation solutions available anywhere. Our vision is to accelerate the adoption of Medical Information Systems, helping providers maximise the return on their technology investments.
