

Easily convert, edit and securely share PDF files

PDF Converter for Mac Better PDF for Mac®

PDF Converter for Mac® enables users to edit and securely share PDF files like never before. Using OmniPage®, the world's leading OCR technology, PDF Converter for Mac easily and accurately converts PDFs into editable formats, saving valuable time and enabling users to increase productivity and get the most out of their documents.

Everything today's Mac users need to work smarter and faster

- Effortlessly assemble 100% industry-standard PDF files
- Quickly and accurately convert documents in real time – no account set-up or email delivery required*
- Convert to Microsoft® Office formats that are compatible with Apple® Pages, Numbers and Keynote
- Send to Evernote® and email
- Scan directly to searchable PDF documents
- Search and black out (redact) or replace text

Key benefits of PDF Converter for Mac

Edit directly within PDF files

PDF files are no longer difficult to change. Simply edit, delete and add text as needed. You can also insert, move, copy, resize and delete images.

Scan directly to searchable PDF

Scanning to PDF isn't useful if you can't get access to information. Create PDF documents complete with text that can be copied and searched. Proofread and correct OCR results with ease.

Collaborate like never before

Exchange ideas and provide directions by adding notes, text boxes, graphics and more to PDF documents. Mark up documents with highlighting, underscoring and strikethrough formatting. Create custom stamps and apply them on your documents.

Key benefits

- Edit directly within PDF files
 - Scan directly to searchable PDF
 - Collaborate like never before
 - Combine and assemble documents with ease
 - Accurate PDF conversion to Microsoft Word or other Office formats
 - Enhance document security
 - Protect your information
 - Create forms or convert existing non-fillable forms into fillable forms
-

Combine and assemble documents with ease

Insert and remove, reorder, delete or combine pages in a PDF with drag and drop ease. Open the files you want to work with and simply drag the pages you need into a new document.

Accurate PDF conversion

Don't waste valuable time recreating documents with complex layouts and graphics. Convert PDF files into Microsoft® Word, Excel®, PowerPoint® and RTF documents in real time – complete with the accurate, fully formatted text, columns, tables and graphics.

Enhance document security

Ensure compliance with government regulations regarding document security by safeguarding confidential information with 128-bit or 256-bit AES encryption and 256-bit AES Unicode passwords.

Protect your information

Black out or erase text from documents to protect sensitive information. Text and images can be edited or deleted to keep safe from prying eyes. You can even use search and redact to eliminate the text throughout a PDF document.

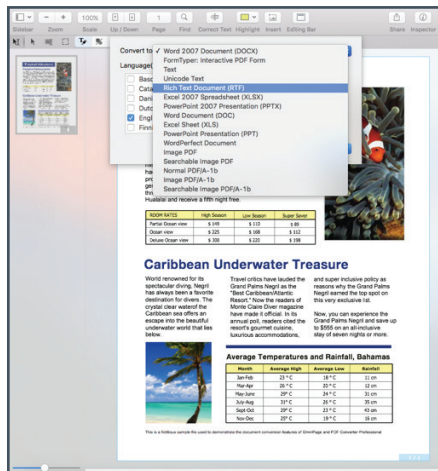

Create forms or convert existing non-fillable forms into fillable

Don't let the hassle of filling out long forms slow down business. Using FormTyper™, you can take a non-fillable form and convert it into a fillable PDF form that you can complete, save and email. PDF Converter for Mac also lets you build cross-platform PDF forms by adding text fields, checkboxes, radio buttons, and signature fields.

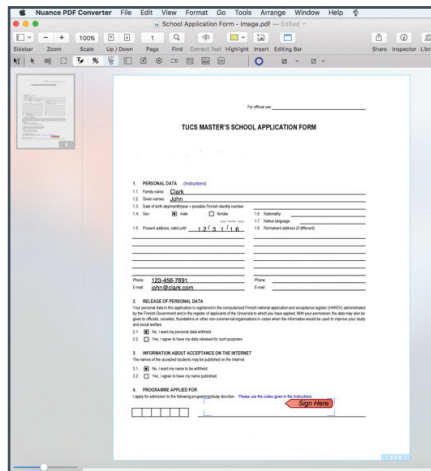

System Requirements

- Mac OS X 10.11 or 10.10 (El Capitan, Yosemite)
- Does not support 10.9 and below
- Approximately 100 MB of available disk space
- Some features require Internet access; additional terms apply

See for yourself why PDF Converter for Mac is smart, easy-to-use software that lets anyone convert, edit and collaborate much more efficiently – and effectively.

Accurately convert PDF files with complex layouts and graphics into other business applications.

Create forms or convert existing non-fillable forms into fillable forms.
