Speech Usage Data Notice

As a part of the Service, Nuance collects and uses Speech Data (as defined below) to provide the Service and to tune, develop, enhance and improve the speech recognition technology and other components of the Service, and other Nuance products and services. By accepting the terms and conditions of the Service Agreement you acknowledge and agree that Nuance may collect Speech Data as a part of the Service. Speech Data will only be used by Nuance for the purpose of tuning, developing, enhancing, and improving the speech recognition components of the Service and other Nuance products and services. In order to provide the Service and to carry out the above tasks, Nuance may use third party data processors acting under the strict direction of Nuance, subject to confidentiality obligations. Speech Data collected by Nuance in any country in the European Union will be used and controlled in accordance with applicable law of the country in which the car owner lives. Nuance will not use the Speech Data and any information content embedded therein except as set forth above. "Speech Data" means the audio files of words dictated by you when you use the Service, associated transcriptions and log files generated in connection with your use of the Service.

Nuance will maintain Speech Data as confidential, and will only disclose Speech Data to third parties subject to a confidentiality agreement, provided, however, that Nuance may be obligated to disclose Speech Data if required by court order or to a government institution if required by applicable law.
